

Did you know?
There are more services
included in your
TXT2Remind plan

**Vensa's all-inclusive services
fully integrated in Medtech 32 and Evolution:**

- ✓ Modern Patient Portal
- ✓ Automating Recalls
- ✓ Automating Accounts & Reconciliation
- ✓ Integrated & Secure Payment Platform

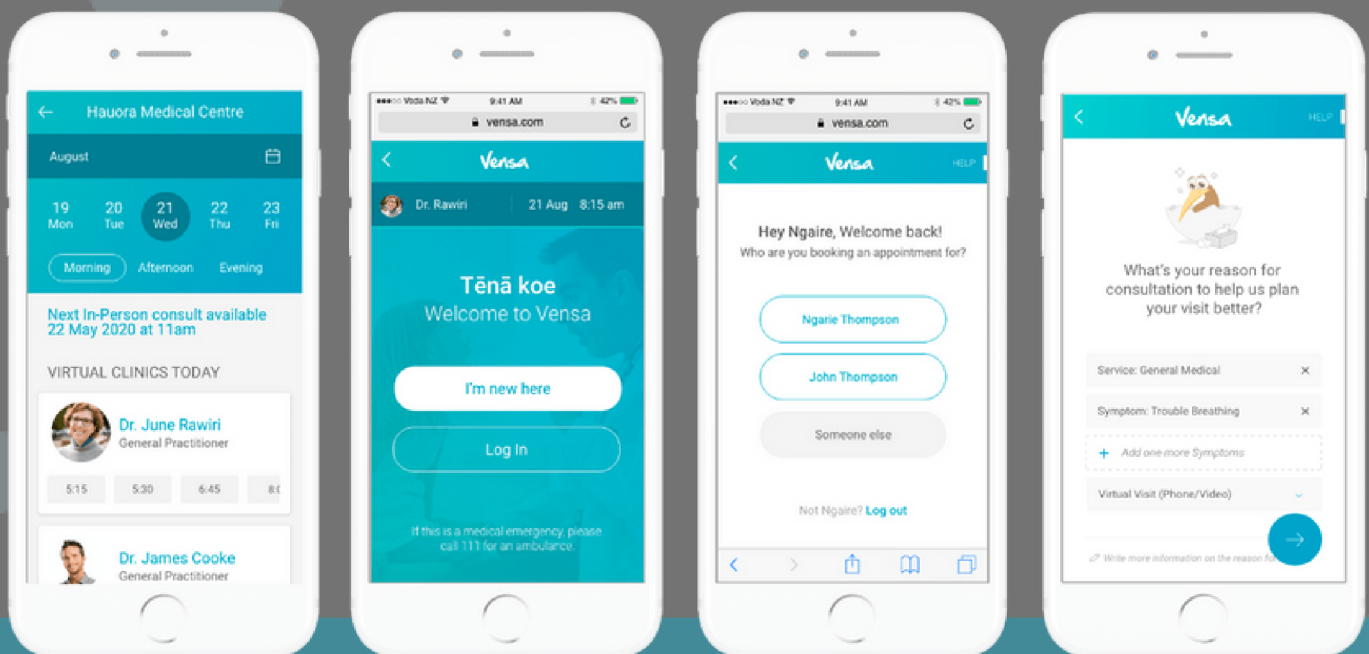

To provide everyone with access to better health & well-being.

Patient Portal: Integrated Appointment Bookings

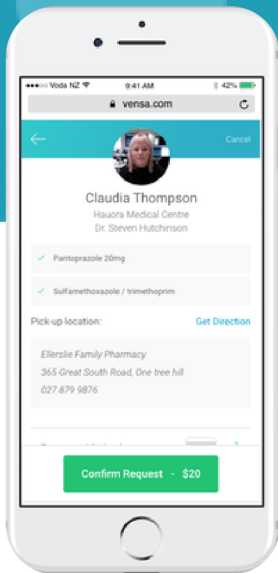

Patients book in under 1 minute with full integration into PMS appointment books - zero work for the practice team!

Clinics can have available nursing and doctors appointments for online bookings. Our online services can be accessed through the patient's home screen on their mobile device or via the clinic's website.

- ✓ **Clinic can choose to enable pre-paid Appointment Bookings or have patients pay on site**
- ✓ Supports whānau health as caregivers can book on behalf of whānau.
- ✓ No double bookings or extra handling with real-time integration into PMS appointment books. Updates mobile number, service request, symptoms and reason for visit in the notes column of the appointment book.
- ✓ Customisation of services and specialty clinics which can be integrated into patient recalls for services. Ability to set payment fees and setup some services to have pre-payments.
- ✓ Ability to customise consult delivery by in-person, telephone, &/or video which is integrated into Vensa's automatic appointment reminders. Clearly communicating an in-person, telephone or video consult and limiting patients arriving to the clinic unnecessarily.

Patient Portal: Repeat Prescriptions with Automatic Reconciliation

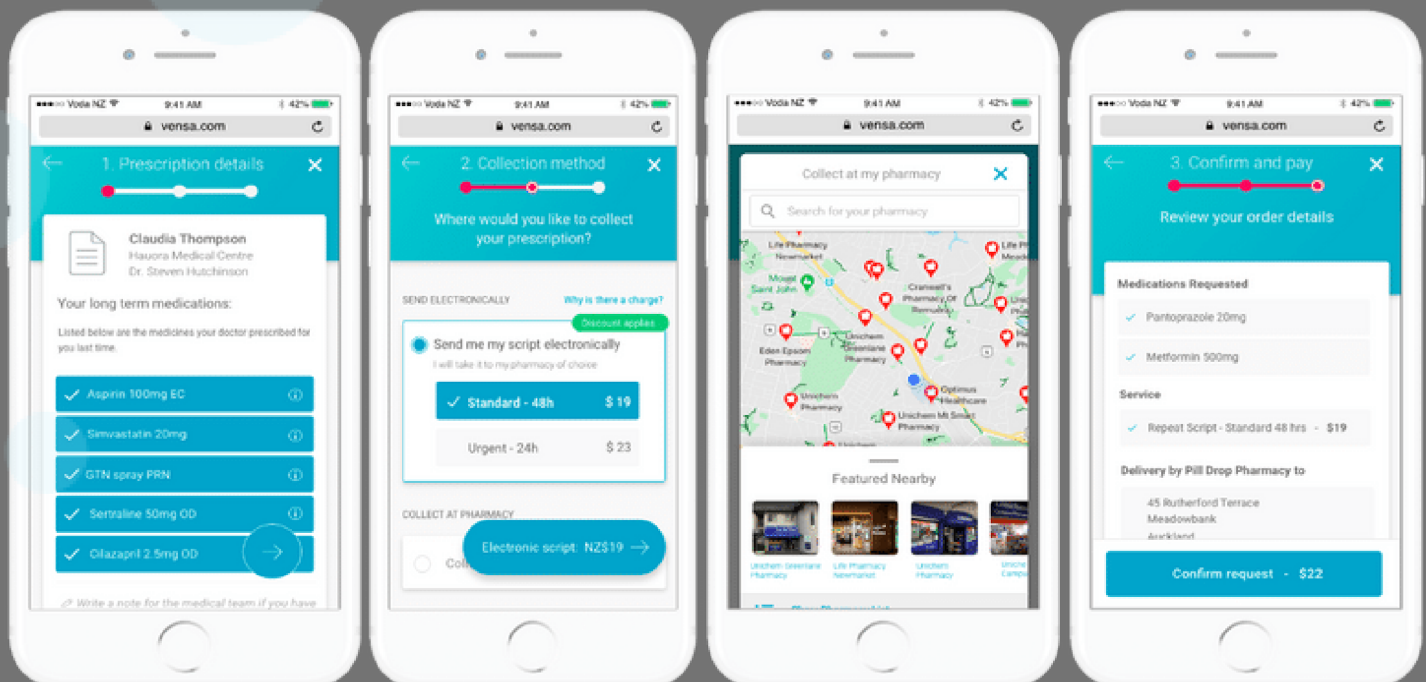

Patients can request and pay for their repeat prescriptions through their patient portal.

Patients are able to select their preferred pharmacy and order from their selection of LTC medications and non-LTC medications.

- ✓ **No administration time as payment*, invoice generation, reconciliation and receipt is handled automatically.**
- ✓ Incoming requests are integrated and can be approved inside the PMS or integrated Vensa platform.
- ✓ Patients can view long-term medications and prescribed medications for the past year. Patients select their preferred pharmacy of choice with Healthpoint link.
- ✓ Linked with Health Navigator so that your patients can learn about their prescribed medications and proper administration.

* Transaction fees may apply

Vensa

Patient Portal: Secure Health Record

Patients can securely access their health record with a modern, intuitive, and user friendly interface.

Easy onboarding with no more clunky registration process.

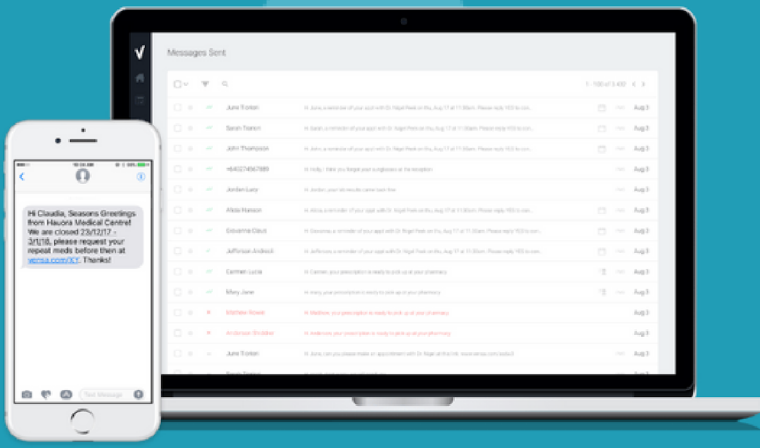

Patients have access to:

- ✓ Health Summary- conditions, health monitoring, health history
- ✓ Care Plan, integrated with Health Navigator content
- ✓ Immunisation history
- ✓ Medication history
- ✓ Shared clinical notes
- ✓ Shared lab results are sent once they are filed with internal comments. Ability to exclude some lab results from being shared.

Whānau can securely access shared dependent's health profiles through **unique pin entry**, enabling new capabilities and better patient access as many kiwi families share an email (ie. elderly populations & people with disabilities).

TXT2Remind for Medtech 32 & Evolution

Streamline all of your patient communications and free-up your practice team.

Appointment Reminders

Automatic reminders that increase appointment attendance and writes back into the PMS, colour coding appointment confirmations and/or cancelations

Optimised Recalls

With only one click you can send bulk recalls for screenings, monitoring and immunisations straight from your recall contact list or by using the CBIT function in Evolution.

Seasonal Notifications

Send bulk messages to groups of your patients updating them on your seasonal offerings. For example, let your patients know your Christmas hours.

Retain Patients Easily

Reduce the time spent following up with patients who are about to lose their funding. Send a bulk text to these patients through our Campaign Manager and remind them to re-enrol.

Automating Recalls & Supporting Health Targets

Providers can now automate recall campaigns to go out to eligible patients at a pre-set time and frequency.

Based upon patient response, PMS read-codes and reporting dashboards are automatically updated. We receive a **60-80% response rate** to every campaign, which equates to thousands of patient records updated overnight.

- ✓ **Zero nurse and administration time to deliver recalls!**
- ✓ Campaigns can run in the evening, while the clinic is closed & has highest response rates
- ✓ Confirmation of patient contact details & updating patient data in PMS
- ✓ Updates real-time into PMS and reporting dashboards
- ✓ Read-codes in PMS and classifications are automatically updated
- ✓ Integrated booking platform to support patient engagement and automate follow-up
- ✓ User-friendly web platform for teams to work from and updates real-time into PMS

Automation of Accounts with Secure Payments & Reconciliation

Make payments painless for patients and your team.

Set and forget system to make daily, weekly, fortnightly, &/or monthly runs (any frequency of the practice's choosing and targeted age of invoices).

Prevent accumulation of debt and significantly increase your payments through our automatic follow-up reminder to those patients that didn't respond on the first attempt.

Zero

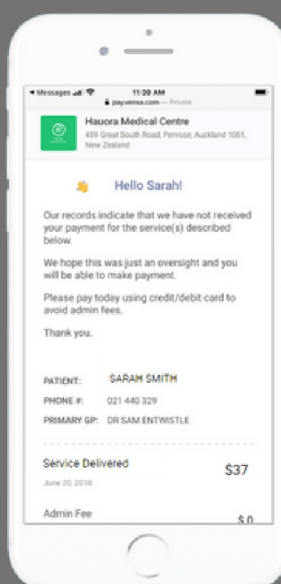

Staff time with automatic daily campaigns.

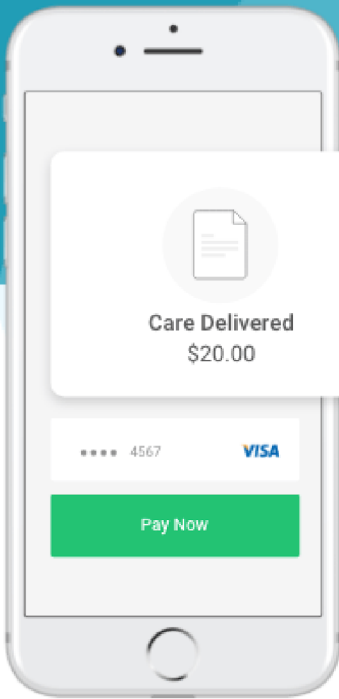

66%

Invoices are paid overnight.

85%

Invoices are paid with our automated second reminder feature.

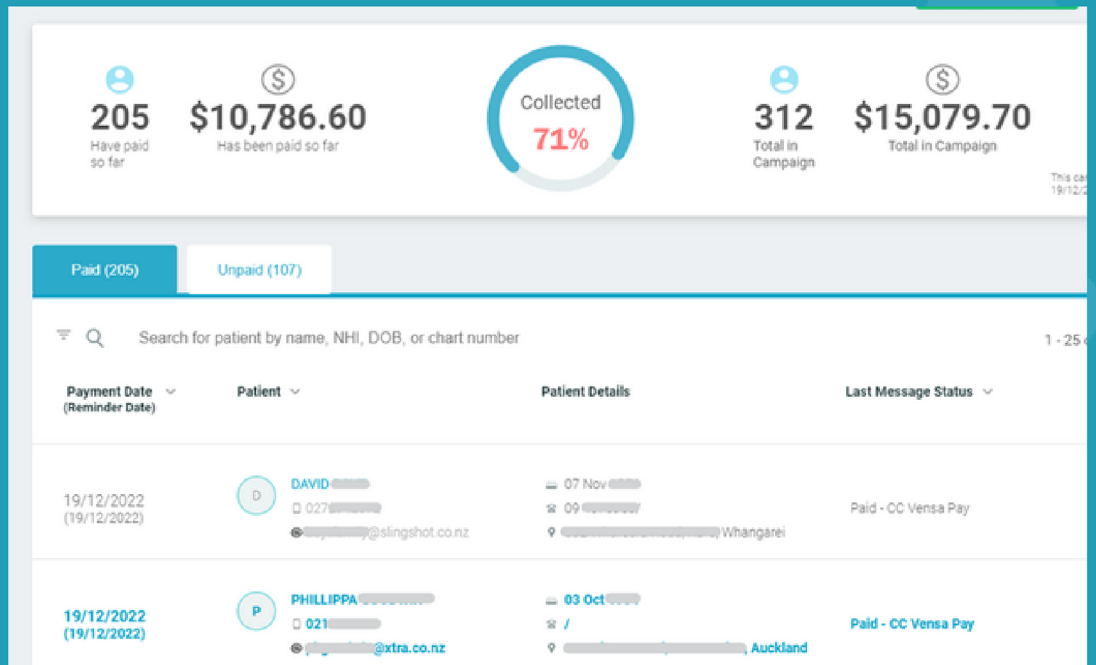

Automation of Accounts with Secure Payments & Reconciliation

The system automatically collects payment, reconciles invoice in PMS, and emails receipt.

For unpaid invoices, practice teams have a user-friendly dashboard to know in real-time patients disputing invoices or requiring follow-up.
